SUMMARY

Computer Engineering student at Gachon University with a strong interest in artificial intelligence, cybersecurity and software development. I build real-time computer-vision systems, full-stack web apps and cross-platform tools, from webcam attention analytics to a stock-portfolio widget for Windows and Android. Seeking internship and collaboration opportunities in AI, security and software engineering.

EDUCATION

Gachon University 2024 – Present
Bachelor of Engineering, Computer Engineering · South Korea

SELECTED PROJECTS

ClearKo Nov 2026 · open source
Python · FastAPI · OpenCV · PaddleOCR · Ollama · Next.js · TypeScript

- Explains photographed Korean contracts in Uzbek, Russian or English, with red flags that quote the original Korean (OCR, a local LLM that reviews every clause, fixed rules). Found 31 of 32 planted problems versus 22 for a plain prompt; 170 tests.

Live Audience Attention Tracker Aug – Sep 2026
Python · MediaPipe · OpenCV · FastAPI · WebSockets · NumPy · Pandas

- Real-time computer-vision system that labels each audience member as attentive, partially engaged or away, using 3D head pose (yaw/pitch) and eye-gaze blendshapes.
- Live browser dashboard with engagement %, automatic camera calibration, CSV session logs and HTML reports with attention-dip detection.
- Privacy-first design: stores only per-second aggregates, never video frames, face images or identities.

Finance Widget 2026 · open source (MIT)
Electron · React · TypeScript · Kotlin · Jetpack Compose · WorkManager

- Stock-portfolio tracker for Windows and Android with allocation chart, gain/loss, USD/KRW toggle and a home-screen widget; all data stays on the device (no account, no server).
- Fixed a currency bug that showed a KRW stock as a +37,765% gain by making every price carry its own currency; 56 unit tests on Android.

Audience Polling & Q&A Jul – Aug 2026
Next.js 15 · React 19 · TypeScript · Supabase (PostgreSQL) · Tailwind CSS · Plotly

- Real-time Slido-style polling: hosts launch polls and audiences vote by room code or QR code, with live charts and no page refreshes (Supabase Realtime).
- Row Level Security separates host and audience privileges; Vercel Cron Jobs clean up stale rooms automatically.

Recipe Manager 2026
TypeScript · Node.js · Express · SQLite · Google Gemini API

- Converts recipe websites, YouTube videos and Instagram posts into structured, searchable recipes; Gemini's multimodal API reads videos directly, with JSON-LD/Microdata fallbacks and JSON-Schema-constrained output.

Overlap 2026 · overlap-vert.vercel.app
Next.js 16 · TypeScript · Vercel

- Korean-first, bilingual campus web app connecting students who already share a course, club or free hour; live on Vercel.

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, Kotlin, Java, SQL, HTML & CSS
AI & Vision	MediaPipe, OpenCV, PaddleOCR, Ollama, Google Gemini API, NumPy, Pandas
Web & Mobile	Next.js, React, React Native, Expo, Tailwind CSS, Electron, Jetpack Compose
Backend & Data	Node.js, Express, FastAPI, WebSockets, Supabase, PostgreSQL, SQLite, Streamlit
Tools	Git & GitHub, GitHub Pages, Vercel

CERTIFICATIONS

Claude Academy: Claude 101 · Anthropic, Sep 2026
Google Cybersecurity Professional Certificate · Google / Coursera
Machine Learning A-Z: AI, Python & R · SuperDataScience, Aug 2025
100 Days of Code: Python Pro Bootcamp · Udemy, May 2025

LANGUAGES

English · Native / bilingual
Uzbek · Native / bilingual
Korean · Limited working
